

THREATMAPPER

Vulnerability Assessment & Penetration Test Report

Date Generated: May 19, 2026 - 09:33:01

Target Scope: Multiple Internal/External Assets

Classification: CONFIDENTIAL

Generated Automatically by ThreatMapper Security Engine

1. Executive Summary

This document outlines the findings of a comprehensive vulnerability assessment performed by ThreatMapper. The objective was to identify security misconfigurations, unpatched vulnerabilities, and structural weaknesses that could be exploited by malicious actors.

A total of 7 vulnerabilities were discovered across the in-scope assets.

Overall System Risk: MEDIUM	Calculated Severity Score: 70
-----------------------------	-------------------------------

Vulnerability Breakdown:

- Critical: 0
- High: 0
- Medium: 7
- Low: 0
- Info: 0

2. Findings Overview Matrix

Target Host	Vulnerability	Severity	CVSS	OWASP Class
SAST_Code	Possible SQL Injection in Source Co	Medium	4	A05:2021 Security Misconfiguration
SAST_Code	Possible SQL Injection in Source Co	Medium	4	A05:2021 Security Misconfiguration
SAST_Code	Possible SQL Injection in Source Co	Medium	4	A05:2021 Security Misconfiguration
SAST_Code	Possible SQL Injection in Source Co	Medium	4	A05:2021 Security Misconfiguration
SAST_Code	Possible SQL Injection in Source Co	Medium	4	A05:2021 Security Misconfiguration
SAST_Code	Possible IDOR in Source Code	Medium	4	A05:2021 Security Misconfiguration
SAST_Code	Possible IDOR in Source Code	Medium	4	A05:2021 Security Misconfiguration

3. Detailed Vulnerability Analysis

1. Possible SQL Injection in Source Code [Medium]

Affected Host: SAST_Code

CVSS Base Score: 4

OWASP Category: A05:2021 Security Misconfiguration

Technical Details / Proof of Concept:

Line 54 matched SQL Injection heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.

2. Possible SQL Injection in Source Code [Medium]

Affected Host: SAST_Code

CVSS Base Score: 4

OWASP Category: A05:2021 Security Misconfiguration

Technical Details / Proof of Concept:

Line 56 matched SQL Injection heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.

3. Possible SQL Injection in Source Code [Medium]

Affected Host: SAST_Code

CVSS Base Score: 4

OWASP Category: A05:2021 Security Misconfiguration

Technical Details / Proof of Concept:

Line 59 matched SQL Injection heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.

4. Possible SQL Injection in Source Code [Medium]

Affected Host: SAST_Code

CVSS Base Score: 4

OWASP Category: A05:2021 Security Misconfiguration

Line 63 matched SQL Injection heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.

5. Possible SQL Injection in Source Code [Medium]

Affected Host: SAST_Code
CVSS Base Score: 4
OWASP Category: A05:2021 Security Misconfiguration

Line 64 matched SQL Injection heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.

6. Possible IDOR in Source Code [Medium]

Affected Host: SAST_Code
CVSS Base Score: 4
OWASP Category: A05:2021 Security Misconfiguration

Line 85 matched IDOR heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.

7. Possible IDOR in Source Code [Medium]

Affected Host: SAST_Code
CVSS Base Score: 4
OWASP Category: A05:2021 Security Misconfiguration

Line 89 matched IDOR heuristic logic

Recommended Remediation:

Follow standard secure coding practices. Refer to OWASP guidelines for mitigation techniques specific to this class of vulnerability.
